PROFESSIONAL SUMMARY

B.Tech Information Technology student at NIT Srinagar (CGPA: 8.34) with strong expertise in Data Structures, Algorithms, and Full-Stack Development. Competitive programmer holding a **LeetCode Knight Badge (Peak Rating: 1874)** with 240+ problems solved. Experienced in production-grade Generative AI integration using the Gemini and OpenAI APIs, agile development, and AI-assisted engineering workflow tools.

EDUCATION

National Institute of Technology Srinagar

2024 – 2028

B.Tech in Information Technology | **CGPA: 8.34**

TECHNICAL SKILLS

Languages:	Java, C++, C, JavaScript, TypeScript, SQL
Web & Backend:	React, Node.js, Express.js, HTML, CSS, EJS
AI & Cloud:	Gemini API, OpenAI API, Google Cloud Run, Prompt Engineering, Cursor AI
Core CS:	DSA, Operating Systems, OOP, DBMS, SDLC, Agile Methodologies
Tools:	Google AI Studio, Git, GitHub, Linux, MySQL, Postman, VS Code, IntelliJ IDEA

PROJECTS

Nexus-AI | React, TypeScript, Gemini API, Google Cloud Run

[Live Demo](#)

- Engineered and rapid-prototyped an AI-driven web application using React and TypeScript during the Vibe2Ship Hackathon.
- Integrated the Gemini API via Google AI Studio to deliver contextual, low-latency intelligent responses.
- Containerized and deployed the application infrastructure to Google Cloud Run, ensuring seamless scalability and high availability.
- Utilized cutting-edge AI-assisted development (vibe coding) methodologies to optimize velocity, code generation, and iterative debugging cycles.

Bank Account Management System | Java

- Built a console-based banking application applying robust Object-Oriented Programming (OOP) principles and design patterns.
- Implemented secure user authentication protocols and transactional workflows.
- Ensured system stability and data integrity through custom exception handling and input validation.

Tesla Homepage Clone | HTML, CSS, JavaScript

- Developed a fully responsive, pixel-perfect Tesla landing page clone featuring modern UI layouts.
- Implemented interactive frontend components using vanilla JavaScript to enhance user engagement.

COMPETITIVE PROGRAMMING

- LeetCode Knight Badge** (Peak Rating: 1874).
- Solved 240+ algorithmic problems across graphs, trees, dynamic programming, greedy algorithms, and recursion.
- Participated in the Rhapsody Competitive Coding Challenge organized by IISc Bengaluru.

ACHIEVEMENTS & ACTIVITIES

- Vibe2Ship Hackathon:** Developed Nexus-AI, a rapidly prototyped React application utilizing Google AI Studio and deployed via Cloud Run.
- Cursor Hackathon Kashmir:** Engineered an AI-powered symptom analysis and doctor discovery application.
