PROFESSIONAL SUMMARY

B.Tech Information Technology student at NIT Srinagar (CGPA: 8.34) specializing in full-stack web architecture, robust Object-Oriented systems, and advanced Data Structures and Algorithms. Competitive programmer holding a LeetCode Knight Badge (Peak Rating: 1874) with 240+ problems solved. Experienced in production-grade AI API integrations, agile development methodologies, and building highly performant, accessible digital interfaces.

EDUCATION

National Institute of Technology Srinagar — B.Tech in Information Technology 2024 – 2028
Cumulative GPA: 8.34 / 10.00

TECHNICAL SKILLS

Core CS & Logic: Java, C++, C, Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems

Full-Stack Web: React, Node.js, Express.js, TypeScript, JavaScript, HTML, CSS, EJS, SQL, DBMS, MySQL

Cloud & AI: Google Cloud Run, Gemini API, OpenAI API, Prompt Engineering

Tools & Workflow: Linux, Git, GitHub, Postman, VS Code, IntelliJ IDEA, Google AI Studio, Cursor AI, SDLC, Agile Methodologies

ENGINEERING PROJECTS

Nexus-AI React, TypeScript, Cloud Run, Gemini API

- Engineered and rapid-prototyped a low-latency web application integrating the Gemini API for contextual, intelligent responses.
- Containerized the application infrastructure and deployed it to Google Cloud Run, ensuring high availability and seamless scalability.
- Utilized AI-assisted development workflows (Cursor AI) to optimize velocity, code generation, and iterative debugging cycles.

Bank Account Management System Java, OOP Design

- Built a secure, console-based banking application enforcing strict Object-Oriented Programming (OOP) principles and robust design patterns.
- Implemented secure user authentication protocols and managed complex transactional workflows.
- Engineered system stability and data integrity utilizing custom exception handling and comprehensive input validation.

Tesla UI Architecture HTML, CSS, JavaScript

- Developed a fully responsive, pixel-perfect landing page clone featuring modern, high-fidelity frontend layouts.
- Implemented interactive UI components and dynamic layouts using native browser APIs and vanilla JavaScript.

COMPETITIVE PROGRAMMING

- LeetCode Knight Badge (Peak Rating: 1874):** Solved 240+ algorithmic problems across graphs, trees, dynamic programming, greedy algorithms, and recursion.
- Rhapsody Competitive Coding Challenge:** Actively participated in the algorithm challenge organized by IISc Bengaluru.

ACHIEVEMENTS & ACTIVITIES

- Vibe2Ship Hackathon:** Engineered Nexus-AI, a rapidly prototyped React application integrating the Gemini API, successfully deployed via Google Cloud Run.
- Cursor Hackathon Kashmir:** Developed an AI-powered diagnostic and doctor discovery application, optimizing development workflows with generative AI tooling.
